

At first, the two have a common start hiking. In front of City Hall, right down the avenue of Yorktown. A few minutes later, turn left into the path Bessurane to Saint Claude Chapel, passing along the cemetery.

At the chapel, the trail begins on the left by a steep slope.

After 15 minutes of climb:

First ride: overlooking Bar sur Loup

Turn left and take the shady trail that follows the canal du Loup, Cannes aqueduct that supplies drinking water. This easy walk back to the village after about 1 hour of walking.

Second hike: Gourdon the way to heaven

Since the crossing with the walk returning to the village, continue straight following an almost flat road to the intersection with Chemin du Paradis is the Pont du Loup. At this point, turn left and follow the narrow and winding road that leads you to the aqueduct of Foulon (25 minutes). (Under the water, drinking fountain)

At the crossroads of the fountain, continue the climb to Gourdon, arriving after about 1 hour. From there, a magical landscape encompasses the entire coast of Theoule Nice.

The route of the GR 51 is currently prohibited due to landslide
